TW**AUDiO**®

Update procedure of TW AUDiO Speaker Presets for Powersoft X-Series, release A3.9.1

Please follow this guide to update your TW AUDiO speaker presets for Powersoft X-/Canali-series amplifiers in the Armonía 2.11 controller platform.

1. Download the latest installation files package from TW AUDiO website.
   https://www.twaudio.de/en/product/amplifiers-software/armonia-software-everything-is-under-control/

2. Unpack the .zip-file.
   The .zip-file contains the installation file for Armonía 2.11.4, the installation file for the preset update and further documentation regarding the latest presets.

3. Install the Armonía 2.11.4 first!
   Filename: Armonia-2.11.4.19306_setup.exe

4. Install the preset release A3.9.1.
   Filename: TW AUDiO Armonia Presets A3.9.1_setup.exe

This update will replace your current TW AUDiO speaker presets with the presets from release A3.9.1. The update procedure will not affect the data in your local user preset path as well as the presets from other manufactures.

Note – If there will be problems with the installation procedure of the new preset package it is possible that you have to delete the following files from older Armonia versions.

1. Navigate to the Armonia installation folder and uninstall it by clicking on the file unins000.exe
   Typical installation path: C:\Program Files\Powersoft

2. Wait for the uninstall to be completed and remove the installation folder.

3. Install the Armonía 2.11.4 again.
   Filename: Armonia-2.11.4.19306_setup.exe

4. Install the preset release A3.9.1.
   Filename: TW AUDiO Armonia Presets A3.9.1_setup.exe
